OK. Just checking. If you can send me a new schedule that would be great!

Yep! We moved it up in the White House update. This is largely because we don't want any surprises if we manage to get the document out before Inauguration Day. Everyone will have a good idea that this is coming.

We won't know if we can actually make January 19 until post AR/IAR.

Dahnish, is early January right? The last schedule I saw had posting in February.

Ex. 5 Deliberative Process (DP)

I know this is based on old language, but it always helps me to read it with fresh eyes!

Thanks Kathleen! I'm sending this today for the White House update. Let me know if there are any changes I should make and/or delete the part where I discuss the dermal exposure factor.

Sure. Here you go. Materials should be very similar to the communication materials released for BaP concurrent with external peer review, with the exception of the dermal slope factor. The discussion of the dermal slope factor will have to be much more nuanced (you can use the wording in the final email Gina sent to the agency/interagency reviewers).

Hi Kathnleen,

I was wondering if you had a draft for the BaP assessment so I can begin writing communication materials for it.

Thanks,
Salina
